The Water Authority (Diam) seeks to ensure security in the wilayat of Ibri.

In addition, construction is going on in South Al Sharqiyah Governorate to complete the implementation of a project between Bausher and Sohar to the governorate in the future, including an auxiliary water transmission line that reaches the main water line from Sohar to Al Dhahirah Governorate with a length of about 190 km, which includes the extension of a line of pipelines with a total length of about 310 km, and its implementation is expected to be completed during 2021.

Water transmission and interconnection system

Abdulaziz Al-Shidhani explained that Diam pays great attention to strengthening the interconnection system between desalination plants, which is an important pillar in strengthening water security in the Sultanate.

Abdulaziz Al-Shidhani said that work on the water transmission line project between Sohar and Al Batinah Governorate is underway.

Abdulaziz Al-Shidhani pointed out that Diam has started implement- ing a project to strengthen the water transmission system between Al Sharqiyah desalination plants (under construction) in the Wilayat of Jalan Bani Bu Ali in South Al Sharqiyah Governorate and Al Ghubra desalination plants in Al Batinah Governorate to ensure the supply of water from the two desalination plants to the governorates of the Sultanate.
